This information is reported to the DE by local school districts to reflect “**the number of kindergarten students who attended preschool at any time twelve months prior to registering for kindergarten.**” Data is collected by districts using different data collection methods including parent report and district records.

The percentage for each district describes the percentage of kindergarten children who attended a preschool program (district, local private preschool, and/or a preschool funded by Early Childhood Iowa scholarships) for some period of time during 2017-18.

* A school district may be geographically located in multiple ECI areas. In the table, each district is included in only one ECI area determined by the county location of the district office.

Students participating in kindergarten for a second year are not included in this data set.
